

Congress of the United States

Washington, DC 20515

October 28, 1999

Dear Colleague:

As members of the New Democrat Coalition, we want to urge your support of S. 900, the Financial Services Modernization bill, which is soon to be considered on the House floor.

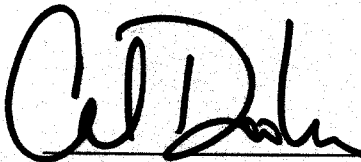

As you know, the House passed its version of the bill, H.R. 10 with broad, bipartisan support. This bill was one of the New Democrat Coalition's "key votes", and our 64-member group supported it overwhelmingly. NDC members who supported H.R. 10 are listed on the back.

The conference report strengthens the House-passed privacy provisions, and modernizes the Community Reinvestment Act. You may be aware that the Reverend Jesse L. Jackson issued the following statement about the bill on Friday:

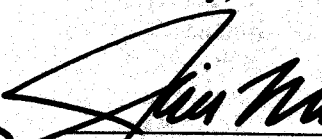

"The financial modernization bill, fully implemented and enforced, can heal the breach between the surplus and the deficit cultures and begin to 'green line' red-lined America."

This bill is strongly supported by the Administration, and our colleague John LaFalce, the ranking member of the Banking Committee, and is consistent with Democratic principles. We urge your support.

Sincerely,

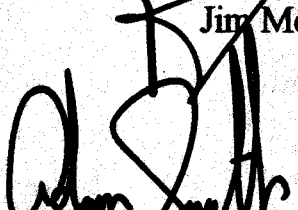

Cal Dooley
